FINAL THREE SITES REMEDIAL DESIGN/REMEDIAL ACTION (RD/RA) POST
MONITORING MAINTENANCE PLAN AND CONSTRUCTION QUALITY ASSURANCE
PLAN, SIERRA ARMY DEPOT, HERLONG, CALIFORNIA

Dear Mr. Dukes:

The Department of Toxic Substances Control has reviewed the above referenced documents. The Construction Quality Assurance Plan, considered the 3-Sites Remedial Design, details the excavation and off-site disposal of pesticide soil at Building 79, and the consolidation of metal contaminated soils, into two on-site Waste Consolidation Units (Old Popping Furnace and Upper Burning Ground). The Post Monitoring Maintenance Plan details the long-term Operations and Maintenance for the sites. Based on our review, we conclude our previous comments have been adequately addressed and incorporated into the final documents.

Sincerely,

Anthony Landis, P.E.
Chief
Northern California Operations
Office of Military Facilities
